

Advanced Antivirus Module | Next Generation Computer Protection

SmartShield® Antivirus is much more than just regular AV – it is the most comprehensive and complete systems protection solution. SmartShield® endpoint protection locks your image - down to the Master Boot Record - while our SmartShield® Antivirus' multi-engine platform protects you and the documents you save. Nothing in the market comes close to this revolutionary, one-two knockout punch protection from malware.

- SmartShield® best-in-class antivirus stops malware on your computer/network.
- SmartShield® endpoint protection permanently erases threats on reboot while allowing you to save to administrator specified directories. All without ever having to unprotect your machine to receive virus updates.

- SmartShield® Antivirus will update automatically – WITHOUT UNPROTECTING YOUR COMPUTER for maintenance
- Zero-Hour detection: Architecture geared towards fast reaction to new threats
- Placed 1st in May 2012 AV detection tests
- Unique, proprietary technology; two-step malware elimination
Integrated antivirus, individual USB blocking, and Firewire blocking provides intrusion prevention of all applications - giving total application control
