SmartShield® endpoint security protection creates a virtual space where all unwanted changes are wiped away upon reboot, freeing the user to perform daily tasks without compromising the integrity of the system. Whether managing computers in a school, library, enterprise, healthcare, banking, or government environment, SmartShield® will provide the ultimate security over user workstations.

Hard Drive Protection

- Prevents all viruses, malicious user intent, and accidental user error from permanently effecting a computer

Optional Directory Protection

- Save documents locally without changing integral parts of the system

USB Blocking & Filtering

- Prevents unwanted data transfer from external devices and prohibits users from saving proprietary network information to external storage devices

Keyboard & Mouse Blocking

- Prevent users from making unwanted change during unprotected maintenance periods

Compatible with Windows and Mac

SmartControl Resource Manager allows you to manage all the features of your SmartShield® clients remotely without having to leave your office. Customize how you run your organization, save time, money, and resources by automating mundane IT chores. Many of your daily responsibilities can now be handled from a single remote location or even scheduled to run on their own.

Centralized & Point-to-Point Console

- Save time by managing all their clients from a central location and can set up multiple consoles with point-to-point connection

File Transfer

- Simplify installs by remotely transferring files to a specified directory

Advanced Scheduling

- Automate updates for Windows and other third-party applications. Auto-Shutdown computers every day with customizable messaging to notify users

Remote Execute

- Install updates and patches, change settings on the local computer, and run maintenance processes

Screenview & V-Control Network

- Provide full viewing and interaction capabilities over computers in your network. Troubleshoot and teach by remotely accessing a user computer and sharing the desktop

Energy Saver

- Be green and save green\$. Accurate Energy Saver reports based on computer profiles and local energy costs

Advanced Antivirus

- Add another layer of protection with SmartShield® Antivirus. Definitions updated automatically without having to turn off SmartShield® drive protection
