- ✓ **Block offensive sites**
- ✓ **Allow authorized sites**
- ✓ **Category Filtering**
- ✓ **Restrict disruptive software (chats, games)**
- ✓ **Block unapproved downloads (video, exe)**

Simply The Best Internet Restriction Solution!

**BrowseControl is an easy to use Internet Management program that helps prevent inappropriate surfing and enforces Internet usage policies across your enterprise.**

### ✓ **Enable/Disable Internet Access**

Totally block or allow Internet access to individual or group PCs/Users, conveniently from a central console.

### ✓ **Allow Access to Approved URLs**

Enable browsing to selected sites only, lock out the rest.

### ✓ **Block Inappropriate URLs**

Restrict access to non-work related sites.

### ✓ **Scheduler**

Schedule unrestricted browsing at specific times (e.g. lunch time). Or allow/block access to specific URLs at allotted times.

### ✓ **Multiple Consoles**

Install separate consoles in each department/classroom, to allow the managers/teachers to manage their own individual employees/students.

### ✓ **Category Filtering**

Customize internet usage by blocking offensive sites from an extensive selection of 100 URL categories.

### ✓ **Application Blocking**

Prevent users from activating unauthorized software: games, chats and media players.

### ✓ **Block Personal Emails**

Block user access to personal email via gmail, yahoo mail, hotmail etc. to ensure that no security threats are bypassed, and increase employee productivity.

### ✓ **Offsite Internet Control**

BrowseControl polices such as allow/block lists and application blocker settings can be configured to offsite laptops.

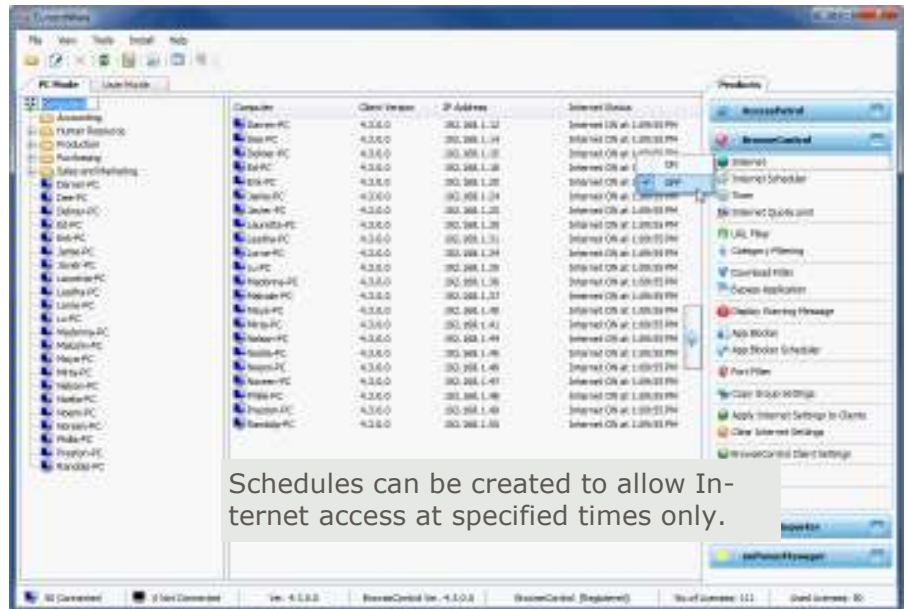

### ✓ **Port Filtering/Block Downloads**

Restrict the downloading of unsolicited files such as video, audio, exe formats to protect your network from malicious files.

**Supported Operating Systems:**

**BrowseControl Server/Console:**  
Win 2003/2008, XP, Vista, Win 7,8

**BrowseControl Client:**  
Win 2003/2008, XP, Vista, Win 7,8

*"BrowseControl is a simple solution to a serious problem. We found it remarkably easy to install and configure and the levels of control it provides, are very extensive and can be customized to suit a wide range of network environments"*  
- Network Computing

**What's New**

**Category Filtering**

Control the Internet access of your employees or students with the comprehensive pre-defined URL category database. Covering more than 100 URL categories, administrators can easily block objectionable web sites through a diverse range of categories.

Category Filtering can be combined with the independent URL Allowed and Blocked lists, to provide a tighter Internet access policy across the enterprise.

**Ensure employee Internet usage is in line with your business acceptance policies.**
