SIMPLY THE BEST WEB FILTERING SOLUTION!

BrowseControl is an easy to use Internet Management program that helps control web access and enforces company usage policies across your enterprise.

✓ URL ALLOWED AND BLOCKED LISTS

The URL Allowed and Blocked lists, enable you to add additional websites to complement the URL Category Filtering.

The Allowed List, permits access to URLs that would normally be restricted if it is part of a blocked category. Conversely the Blocked List will restrict access to unauthorized websites.

✓ URL CATEGORY FILTERING

Customize internet usage by blocking offensive sites from an extensive selection of 100 URL categories.

✓ SCHEDULER

Schedule unrestricted browsing at specific times (e.g. lunch time). Or allow/block access to specific URLs at allotted times.

✓ MULTIPLE CONSOLES

Install separate consoles in each department or classroom, to allow the mangers or teachers to manage their own individual employees or students.

√ APPLICATION BLOCKING

Prevent users from activating unauthorized software: games, chats and media players.

✓ BLOCK PERSONAL EMAILS

Block user access to personal emails via gmail, yahoo mail, hotmail etc. to ensure that no security threats are bypassed, and increase employee productivity.

✓ OFFSITE INTERNET CONTROL

BrowseControl polices such as allow/block lists and application blocker settings can be configured to offsite laptops.

✓ PORT FILTERING/BLOCK DOWNLOADS

Restrict the downloading of unsolicited files such as video, audio, exe formats to protect your network from malicious files.

✓ USER OR COMPUTER BASED POLICIES

Internet restriction policies can be configured by user or by workstation.

SYSTEM REQUIREMENTS

SOFTWARE REQUIREMENT

Windows 7 SP1 Pro/Enterprise and Ultimate

- 32-bit or 64-bit
- Windows 8 & 8.1 Pro/Enterprise 32-bit or 64-bit Windows 10 Home/Pro/Enterprise
- 32-bit or 64-bit
- Windows Server 2008 R2, 2012 and 2016

TESTIMONIALS

"BrowseControl is a simple solution to a serious problem. We found it remarkably easy to install and configure and the levels of control it provides, are very extensive and can be customized to suit a wide range of network environments"

Network Computing

HARDWARE REQUIREMENT

All components of CurrentWare are supported on desktops and servers with the following specs:

- Processor: Any CPU running i3 or similar or faster
- Memory: At least 4GB of RAM
- Disk Space: At least 500MB of disk space

"After looking at other software that told me what I wanted to hear but didn't actually deliver, I needed something that just worked. No hassle, a remote client setup that just works – add in the allowed URL's and walk away. That's exactly what Browse Control did. Configure it on a group or per user basis – whatever way you use it -it just works."
