

- ✓ **Monitor employee browsing activity**
- ✓ **Capture URLs /length of visits**
- ✓ **Generate web usage reports/charts**
- ✓ **Monitor the bandwidth usage**
- ✓ **Compatible with all major browsers**

Simply The Best Internet Tracking and Reporting Solution!

BrowseReporter is a powerful web monitoring tool that tracks user browsing activity. Includes an extensive reporting utility for identifying unproductive employees/students.

✓ **Track and Report Internet Usage:**

Monitor web browsing activity by user or computer basis with comprehensive reporting in both tabular and graphical formats.

✓ **Automated Email Reports:**

Eliminate the manual task of generating reports! Schedule reports to be automatically generated and emailed to you or an administrator on a scheduled basis.

✓ **Schedule URL Tracking:**

Collecting the Internet browsing activity at all times may not be necessary. Schedule URLs to be tracked at specified times only (e.g. business hours only).

✓ **Bandwidth Monitoring:**

Track the Internet traffic on your network, to isolate users that are congesting the organization's bandwidth.

✓ **Remote Screen Capturing:**

Monitor your users' computer activity by capturing screenshots of their computers.

✓ **Compatible with all major browsers**

Track the URL activity on popular browsers such as IE, FireFox, Chrome, Safari.

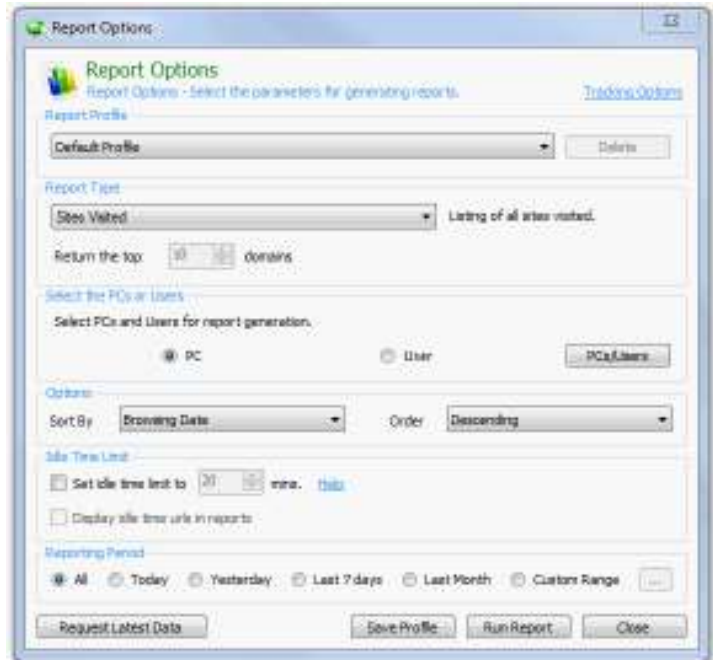

✓ **Exclusion List**

Exclude the reporting of irrelevant URLs.

Supported Operating Systems

BrowseReporter Server/Console:
2000/2003/2008, XP, Vista, Win 7, 8

BrowseReporter Client:
2000/2003/2008, XP, Vista, Win 7, 8

"BrowseReporter has been great in enabling us to give feedback on which sites we need to restrict. With Bandwidth reporting and Remote Screen capturing, BrowseReporter has become the perfect tool for us to monitor our client PCs."

Extraweave Pvt

What's New

Improved Console and Client Architecture

A new designed console, the **CurrentWare Console**, provides a more powerful and robust interface for administering the BrowseControl policies. The new client, the **CurrentWare Client**, can remotely be installed from the Console or through Active Directory.

Terminal Server Compatibility

BrowseControl can now support a Terminal Server environment. Effectively manage the Internet restriction policies of both thin and fat clients.
